

The **Mountain West Preparedness & Response Learning Center** developed the *Just in Time Review of FEMA ICS* as a refresher for students before they enroll in other MWPERLC courses or when they need to review basic ICS principles and tactics before they participate in emergency management exercises.

---

The **Just In Time Review of FEMA ICS (IS-100, IS-200, ICS-300, IS-700)** course was developed as a refresher to the curriculum in the National Incident Management System (NIMS) independent study courses and in-class training offered through the Emergency Management Institute (EMI).

These reviews are not designed to be a substitute for the EMI courses and are intended for audiences who have already received certification in that coursework. The original trainings may be found in full on the Emergency Management Institute's website.

This education is supported by Grant Number 5U90TP000405-3 from the Centers for Disease Control and Prevention (CDC). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the CDC.
